Alopecurus bulbosus

BULBOUS FOXTAIL is a grass. Native to Europe (including Britain, especially the English and Welsh coasts) it has green flower spikelets.

It is also known as *Coda di topo bulbosa* (Italian), *Knölkavle* (Swedish), *Knollen-Fuchsschwanz* (German), *Knolvossenstaart* (Dutch), *Rhonwellt Cadno Oddfynog* (Welsh), *Saltkavle* (Swedish), Tuberous foxtail, *Vulpin bulbeux* (French), *Wiesen-Fuchsschwanz* (German), and *Zwiebel-Fuchsschwanz* (German).

Bulbosus means ‘bulbous or swollen’.

Apparently bulbous foxtail is particularly enjoyed by cattle.
