*Callitriche obtusangula*

[Synonyms : *Callitriche aquatica* subsp. *obtusangula*, *Callitriche palustris* subsp. *obtusangula*]

**BLUNT-FRUITED STARWORT** is an aquatic annual or perennial. Native to Europe (including Britain) it has tiny green flowers.

It is also known as Blunt-fruited waterstarwort, Starwort, and Water starwort.

The flowers are pollinated by wind.

*Obtusangula* is made up of Latin *obtusus* (blunt) and *angulus* (angle, corner) components with reference to the fruit.
