Crassula lycopodioides

[Synonyms : *Crassula muscosa*]

CLUB MOSS CRASSULA is a succulent perennial. Native to south-western Africa it has minute, whitish-yellow flowers.

It is also known as Elephant grass, *Liekopaunikko* (Finnish), *Lummerkrassula* (Swedish), Moss cypress, *Mosskrassula* (Swedish), Princess pine, Rat-tail crassula, Rattail cypress, Toy cypress, Toy moss, Watch-chain crassula, and Watch-chain cypress.

Lycopodioides is made up of the genus name *Lycopodium* and Greek *-oides* (like) components meaning 'like plants in that (clubmoss) genus'.
