Filago lutescens

[Synonyms : *Filago apiculata*, *Filago germanica*, *Filago pyramidata* subsp. *lutescens*]

RED-TIPPED CUDWEED is an annual. Native to temperate northern regions it has small flowers surrounded by red-tipped petal-like leaves (bracts).

It is also known as *Bělolist žlutavý* (Czech), *Gulgrå ullört* (Swedish), and Plantain leopard's bane.

It is protected in Britain under the Wildlife and Countryside Act 1981.

Lutescens means 'yellowish or becoming yellow'.
