*Hagenia*

*Rosaceae*

*Hagenia* commemorates a German physician, B. Hagen (1853-1919), who worked in Indonesia (then Sumatra) and Papua New Guinea (then part of New Guinea) from 1879-1895. He collected particularly plant and butterfly specimens in Indonesia during the first two years. In 1895 he returned home to Germany where, from 1897-1904, he was appointed Chief of a Division of the Frankfurt Senckenberg Museum (the largest natural history museum in Germany). His published works include *Die Pflanzen and Thierwelt von Deli auf der Ostküste Sumatra's*.
