Herniaria hirsuta

HAIRY RUPTUREWORT is a prostrate annual or perennial. Native from Europe (including Britain) to central Asia, it has tiny, greenish-yellow flowers.

It is also known as *Luddknytling* (Swedish), *Prietržník* (Slovak), *Průtržník chlupatý* (Czech), and Rupturewort.

Hirsuta is Latin (shaggy, rough) meaning 'hairy'.
