*Kickxia*

*Scrophulariaceae*

[*Plantaginaceae*]

*Kickxia* commemorates either a father or son, both Flemish botanists. The father, Jean Kickx (1775-1831), who was a professor of botany, pharmacy and mineralogy in Brussels, wrote *Flora bruxellensis*. His son, Jean Kickx (1803-1864), completed *Flore cryptogamique des Flandres* drafted by his father, although authorities believe he did not specialise in these flowerless plants.
