Narcissus x odorus

[Synonyms : *Narcissus calathinus*, *Narcissus campernellii*]

CAMPERNELLA is a hybrid bulbous perennial. It has small fragrant, yellow trumpet flowers. It is also known as Campernelle, Campernelle jonquil, and Seashore daffodil.

Warning – campernella is as poisonous as others of the narcissus family.

Odeur is derived from Latin *odor* (scent, smell, odour) meaning ‘scented or fragrant’.

Like jonquil (*Narcissus jonquilla*) campernella’s fragrant flowers yield a sweet-smelling, yellow oil that is used by the French perfumery industry.
