Parapholis strigosa

[Synonyms : *Lepturus filiformis*, *Lepturus incurva* var. *filiformis*, *Lepturus incurvatus*,
Lepturus strigosus, *Parapholis filiformis*, *Pholiurus filiformis*, *Pholiurus incurvus*]

SEA HARD-GRASS is an annual grass. Native to the Mediterranean and to western Europe it has very slender, stiff spikes of tiny, green or purplish spikelets.

It is also known as *Corwellt y Morfa* (Welsh), *Dunstaart* (Dutch), Hairy sicklegrass, Hard-grass, *Ormax* (Swedish), Slender barb grass, Strigose sicklegrass, and *Videnskabeligt navn* (Danish).

Strigosa means ‘with stiff bristles’.
