Parodia leninghausii

[Synonyms : *Eriocactus leninghausii*, *Malacocarpus leninghausii*, *Notocactus leninghausii*,
Pilocereus leninghausii]

GOLDEN BALL CACTUS is a cactus. Native to South America (particularly southern Brazil) it has ribbed, green stem with yellow or pale brown spines and glossy yellow flowers.

It is also known as Goldfinger.

Leninghausii commemorates a Brazilian plant collector, Guillermo Leninghaus.

The cactus is a cultivated as an ornamental plant.
