Phlox carolina

[Synonyms : *Phlox caroliniana*, *Phlox triflora*]

CAROLINA PHLOX is a perennial. Native to south-eastern North America it has small, fragrant deep pink flowers.

It is also known as Thicketleaf phlox.

The flowers are pollinated by humming birds and butterflies.

This phlox is declared as endangered in the wild in the state of Maryland, United States.

Carolina means ‘of or from North or South Carolina (United States)’
