*Phygelius capensis*

**CAPE FIGWORT** is a semi-evergreen subshrub. Native to South Africa it has drooping, yellow throated, pale orange to deep red flowers with a few protruding stamens. It is also known as Cape fuchsia, Orange Cape fuchsia, and Yellow Cape fuchsia. The flowers are pollinated by bees, butterflies, and humming birds. *Capensis* means 'of or from the Cape (South Africa)'. Cape figwort is cultivated as an ornamental plant.
