*Spigelia*

*Loganiaceae*

[*Strychnaceae*]

*Spigelia* commemorates a Flemish physician and anatomist, Adriaan van den Spiegel (1578-1625), who was a professor of anatomy and surgery at Padua. He was made a knight of St. Marcus. His published works include *Isogoge in rem herbariam libri duo* (claimed by some authorities to be the first botanical textbook), and *De humani corporis Fabrica libri X tabulis aere icisis exornati*.
